- ▶ Ability to delegate tasks to others.

VIDATUM Ethics

- ▶ Multiple review committees and meetings.
- ▶ Submitter has full oversight of the application throughout the review process.
- ▶ Anonymised reviewer details and comments.
- ▶ Capturing detailed comments from users, approvers and reviewers.
- ▶ Save multiple versions of the application highlighting changes in re-submission.
- ▶ Ability to include external approvers.
- ▶ Committee management including meeting dates and agendas.

VIDATUM Timesheets

- ▶ Multiple working calendars for accurate timesheets.
- ▶ Capture research and non-research activities.
- ▶ Management Reporting for Timesheet compliance.
- ▶ Configuration of Timesheet rules.
- ▶ Comply with funder audit requirements.

Managing research activities in an institution is a complex and time-consuming job.

Our powerful intuitive cloud-based solution is designed with research administrators in mind. **VIDATUM Academic** fulfils the needs of researchers and administrators in all stages of the administrative process.

From an institutional perspective, we believe
academic research is based on three key principles:

1

Recruitment,
development and motivation
of researchers

2

Securing, managing
and responding
to funding opportunities

3

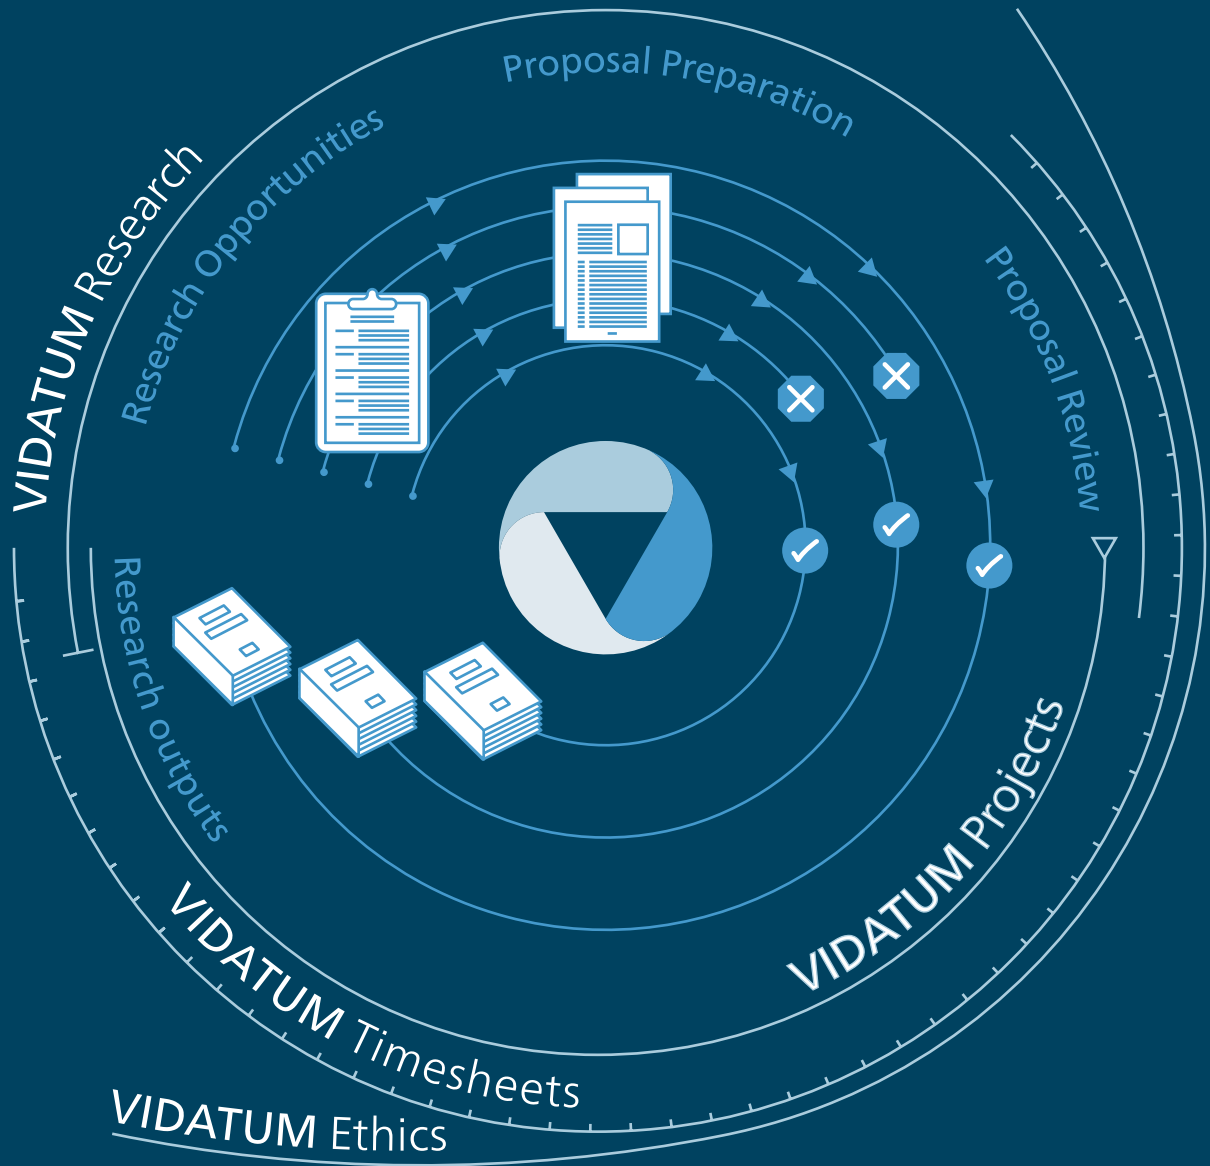

Creating greater oversight
and visibility to the
research project lifecycle

With unparalleled technical expertise and personalised client relationships, **VIDATUM** is a leading provider of software solutions in Ireland and Europe.

Our core offering is **VIDATUM Academic**, a full suite of cloud-based research management solution. In addition to custom solutions in the education sector covering areas such as course planning, management, and online applications.

| | |
|---------------------------|---|
| VIDATUM Research | An independent and comprehensive research management system providing institutions with a single source of publishable information on researchers, publications, funding, collaboration and national reporting compliance. |
| VIDATUM Projects | A full grant lifecycle management application. Manage your research funding in a user friendly and compliant structure, tracking the full lifecycle of a project from research proposal intent to a fully funded project award incorporating contract negotiations, full economic costing, and approval tracking. |
| VIDATUM Ethics | An online easy-to-use solution for streamlining the review and approval of ethics applications. With comprehensive reporting, transparency and time-savings at every stage, VIDATUM Ethics assures good research governance across an institution. |
| VIDATUM Timesheets | Project and non-project staff time tracking with supervisor approval, custom calendars, and staff working patterns. |

VIDATUM Academic

"Integrating Vidatum Academic with our website is a great way for our academic staff to profile their expertise to a global audience."

Noreen Goggin, RSS Database Coordinator, University of Galway

"Working with Vidatum Technologies has been a truly collaborative partnership – they have been open to developing functionality which captures the research and enterprise engagement activity undertaken by the DCU research community."

"This flexibility in approach and ongoing customer support facilitates our institutional reporting requirements and allows us to showcase the quality and diversity of our research to external stakeholders. We look forward to continuing to work closely with Vidatum Technologies to further develop the capabilities of our system."

Fiona Brennan, Senior Research Officer, Dublin City University

"The system continues to grow and evolve to meet the needs of our research community and we are constantly launching new tools and enhancements."

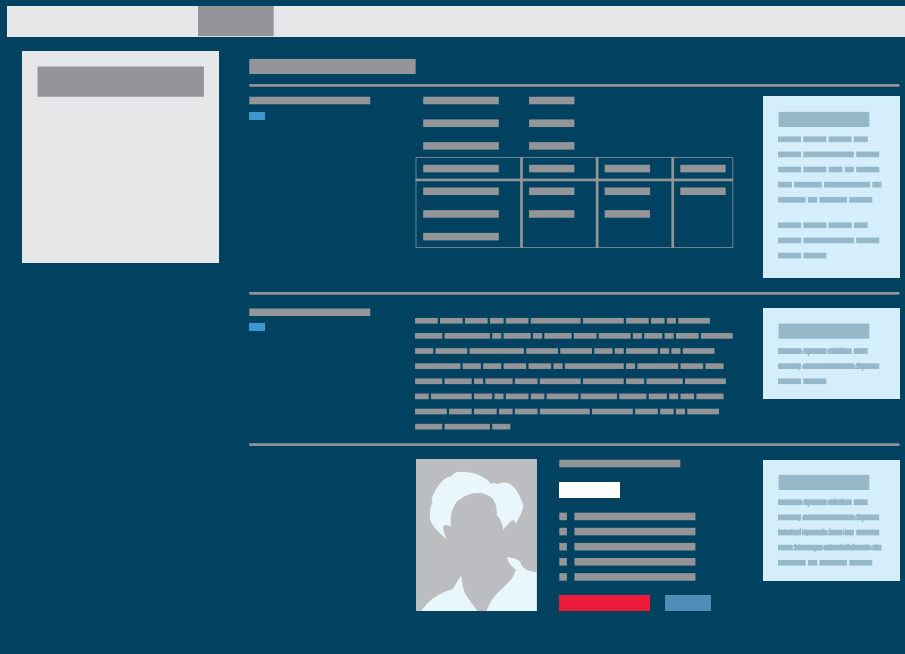

Deirdre Kearney, University of Cork

"RCSI holds a set of very detailed and complex Ethics Applications."

"Our application review process is lengthy and requires involvement from numerous stakeholders. The solution has catered for a Human Application with large online form (exceed 500+ fields) and Animal Application form (100 fields)."

"Both applications provide significant conditional processing. Development of complex workflow engine, has simplified risk prone manual outdated processes."

Shahla Sabetnia, Royal College of Surgeons in Ireland
